

February 4, 2020

Dear Parents:

I thought a note would help explain how the drop off zone beside the 2 Kindergarten classes at the south end of the school is meant to function. It is for a **quick drop off** for students who are able to **independently and quickly** exit your vehicle and go to class **independently**.

If you need to walk your child to class, or wait until the door opens, you need to park on the streets near the school and walk in.

We have a great number of families who use the drop off zone for quick and independent drop off. When families leave their vehicle unattended in the drop off/pick up lane and walk children to or from class, a traffic back log is created.

Please cooperate with our drop off zone. Please be aware that we value your need to say good bye to your child or check in with their teacher but then you need to park and walk in.

This is the same expectation for the end of the day pick up. Please share this information with any family members or caregivers who are picking up or dropping off your children.

Thank you for your understanding.

Sincerely,

Cathy Erickson  
Principal
